PROGRAMMA D’ESAME
Laurea: Studi internazionali per la sostenibilità e la sicurezza sociale
Laboratorio: International Security Studies
Anno di corso: II
Semestre: II
Docente: Federico Niglia

Anno Accademico 2021-2022
SSD: SPS/06
CFU: 3
Carico di lavoro globale: 75 ore
Ripartizione del carico di lavoro: 38 ore di lezione e 37 ore di studio individuale
Lingua di insegnamento: English (inglese)

[PREREQUISITES] PREREQUISITI
No specific prerequisites are required, except for a basic knowledge of the B2 English language.

COURSE OBJECTIVES [OBIETTIVI FORMATIVI]
Students attending the Laboratory will achieve the following objectives:

A) Knowledge and comprehension
   a. Become familiar with the main theories and interpretation related to the problem of security in international relations.
   b. Understand the question of international security in its historical development from the Modern age to the present days.

B) Ability to apply the acquired knowledge and understanding:
   a. Analyse and discuss the emerging threats to international security in the current world.
   b. Develop both practical and analytical tools to critically address selected case studies.

* The objectives of the course are in line with the requirements of the SUA document adopted by the CdS.

COURSE CONTENT [CONTENUTO DEL CORSO]
This course will investigate the question of security in the contemporary world. We will examine the ideas, theories, and histories of different questions related to security from the modern age up to the present days. We will also analyze the response of scholars and policy-makers to insecurity and explore the resources available to counter threats to security, from diplomatic options to the use of force. A special insight will be given on the new threats, specifically on the technology-related ones. The laboratory will also include a simulation on a selected case study.

TEACHING METHODS [METODI DIDATTICI]
Full-time students
Lecture-based with discussions. Simulation of a case study under the coordination of the Professor (material will be given by the instructor using the LOL-Platform)

Non-attending students

In addition to the textbook, non-attending students will have to contact the Professor for additional readings.

* In case of adverse conditions resulting from the Covid-19 pandemic, the laboratory will be conducted using virtual or “blended” learning approach on the digital platform of the University [Nel caso in cui le condizioni generali relative alla pandemia lo richiedano, saranno adottate modalità di didattica blended o totalmente a distanza].

**ASSESSMENT [METODI DI ACCERTAMENTO]**

For attending students the assessment will consist of an evaluation of the participation in the simulation (30% of the final grade) and of a final oral exam (70% of the final grade). Non-attending students will take a final oral exam.

The frequency of the Course online platform Web Class’ use by both attending and non-attending students will be regularly checked.

* Students affected by DSA certified by the Students’ Office will have access to measure reducing and/or cancelling some parts of the course. Each request will be taken into consideration autonomously. Any request/inquiry has to be sent in advance to the instructor independently through the “Commissione disabilità e DSA”.

**READINGS [TESTI DI RIFERIMENTO]**

Full-time students

- Materials for the simulation distributed by the Professor.

Not-attending students

- Materials distributed by the Professor.

**ADDITIONAL READINGS [TESTI DI CONSULTAZIONE E Approfondimento]**

**OTHER INFORMATION**

Class attendance is required for Full-Time Students, who have to actively engage in the discussion and other class activities.

Non-attending students are kindly required to contact the Professor at the following email address: federico.niglia@unistrapg.it
